## Chair's report

Vice Chancellor Frank Williams has recommended that the SW Vice President for Finance be briefed on our activities. Deb Wells and John Craven will meet with Jm Lynch next week. Terry Kelly has asked the MPC to consider the fate of the Duckering Building parking lot after completion of the Duckering Building deferred maintenance project that is just beginning. This should be addressed as

installation. This is an issue that is the responsibility of Faculties Services. The MPC is not aware of any further actions required by it concerning these matters.
