

Starry Sky Projector

Enjoy watching starry lights with a homemade projector!

Materials Needed

Empty cardboard container without lid
(such as a shoebox or oatmeal container),
aluminum foil, scissors, towel, pencil,
battery-operated flashlight or headlamp.

Instructions:

Step 1 Cut a piece of aluminum foil large enough to cover the top of your box. Lay a towel on a surface and place your piece of foil on top.

Step 2 Use the end of a sharp pencil to punch holes all over the foil.
