Memorandum

RECEIVED

Professor J. G. Christie, B.Sc., M.A., Ph.D.

Information Officer

RECOMMENDATION FOR GRADUATION FROM THE UNIVERSITY OF TORONTO

Mr. J. G. Christie

Please be advised that the following student has been recommended for graduation from the University of Toronto in the Faculty of Arts in the year 1942.

Major...where you regularly go running around the campus and I am not surprised to find

him graduated. He is a good boy.

RECOMMENDATION FOR GRADUATION FROM THE UNIVERSITY OF TORONTO

APPROVAT.S.

2009 Program Review

Biological Sciences: Wildlife Biology

Ver 5.0

faculty are considering making the program more interdisciplinary by adding courses from other disciplines.

- Add courses from other disciplines.
- Develop programs which will allow students to receive both the biological and professional training.

Number of students in the program has increased over the last few years. This is due to the fact that the University of Wyoming has expanded its offerings in the field of environmental science and biology.

The program has been successful in meeting the needs of its students.

The program has been successful in meeting the needs of its students.

2009 Program Review Biological Sciences, WILM, B.S.

After consultation about K-12 education, our passed away a number of years ago, led this program. If there were no potential students (K-12 teacher's interests) interested in this program and a faculty who were interested in leading it, then it would be a good program to keep. However, the faculty involved in this program are not interested in leading it. Therefore, I recommend removing the program from the DBW even though it currently incurs a cost to the program.

UAF Ph.D. in Biological Sciences

The Ph.D. program in Biology and Bio-life is the largest Ph.D. program at UAF, with 5-8 graduates per year and ~40 students enrolled. Enrollment numbers are projected to grow to 100 by 2015.

There is a need to identify and increase the number of Ph.D. programs offered in the sciences and engineering. This will help to meet the needs of the state and the nation by increasing research, development, and education opportunities.

For example, the UAF Department of Biological Sciences, currently (mid-fall 2008) has nearly 40 graduate students in their departmental areas of interest. This program, like others in the DBW, is producing many qualified individuals for the job market.

The UAF Department of Biological Sciences is well positioned to meet the needs of the state and the nation by increasing research, development, and education opportunities. This program, like others in the DBW, is producing many qualified individuals for the job market. The UAF Department of Biological Sciences is well positioned to meet the needs of the state and the nation by increasing research, development, and education opportunities. This program, like others in the DBW, is producing many qualified individuals for the job market.

Additional details can be found at www.biology.uaf.edu.

UAF Undergraduate Biology Program

The undergraduate biology program is well suited to meet the needs of the state and the nation by increasing research, development, and education opportunities.

The undergraduate biology program is well suited to meet the needs of the state and the nation by increasing research, development, and education opportunities.
