Syl I abus

PSY F470 W,O; 3 credits Spring 2012 T & Th 9:45-11:15a Classroom Daní K. Sheppard, Ph.D. 706A Gruening Bldg. 474-6514, dani.sheppard@alaska.edu Office hours: TBA

TA: TBA

TA office: TBA; email: TBA@alaska.edu phone: 474-TBA TA office hours: TBA, and by appointment

**Prerequisites:** ENGL F111X; ENGL F211X or F213X; COMM F131X or F141X; nine credit hours of PSY (including PSY F101 & PSY F275); or permission of instructor. (Writing criteria A.1.)

Writing and Oral intensive (W,O): This class meets the university requirements for one of the two core upper division writing intensive requirements, and for the core upper division oral intensive requirement. The requirements

Because of the role of sensation and perception in our daily lives, it is important to learn about them early in our lives. A major part of this course will include working with the students in the Psychology class at West Valley High School to design a booth for the Third Biannual "Sensational Perceptions" Fair that provides depth on one of our sensation or perceptual processes. <u>CRITICAL NOTE:</u> taking this class will require an elevated level of commitment and maturity essential for the continued mentorship of high school students throughout the semester.

Course goals and learning outcomes: The activities, readings, and assignments will enhance your ability to:

outside the classroom (e.g. writing center, Blackboard, my office hours, library, internet, etc), participation in classroom discussion, etc.

#### \* Rubrics for all assignments are included at the end of this essay and are posted on Blackboard for you.

\* Grading criteria for all assignments and determination of subjective components:

| %     | <u>Letter grade</u> |    | Description of subjective assessment  |  |  |  |
|-------|---------------------|----|---|--|--|--|
| 100   | Exc                 | A+ | superb; couldn't be better excellent; above expectations good; meets requirements and done well with clarity and understanding  |  |  |  |
| 90-99 | Exc                 | A  |   |  |  |  |
| 84-89 | Good                | B  |   |  |  |  |
| 80-83 | Good                | B- | basic; meets requirements; lacking in some depth or thought or effort OK; missing some components, most components "OK", or meets requirements with low quality & low effort & little thought |  |  |  |
| 70-79 | Ok                  | C  |   |  |  |  |
| 60-69 | Poor                | D  | missing many parts, poor quality, reflects lack of effort & thought; indicates lack of understanding of assignment  |  |  |  |

# Participation (300 pts)

<sup>\*</sup> Participation points accumulate from a combination of in-class activities (50 pts) and homework (HW) assignments (250pts). There are 14 HW assignments; you will complete one per week. They are due every Tuesday. See course calendar for which assignments are due.

<sup>\*</sup> Homework assignments consist of Themes Summaries (3x30pts=90pts), Ponderables (2x10pts=20pts), Demonstrations (3x20pts=60pts; one of which is oral), Critical Reviews (2x30pts=60pts), and Concept Uses (4x5pts=20pts). Details for each assignment and distribution of assignments across the seven senses are included

consultation with me to review the status of your writing skills (Writing criteria A.4.). Your 14 writing assignments comprise 230 pts from Participation and 40pts from Project, for a total of 270/500 pts, or 54% of your total grade (Writing criteria A.5.). Criteria, format, and grading rubric for each writing assignment are included at the end of the syllabus.

## Important notes and expectations (course policies):

- \* My primary goal is to support your success in this course. I am NOT a mind-reader. Take advantage of my very lonely and under-utilized open-door office hours!! I'm happy to talk with you about content, lectures, tests, study strategies, grades, and anything else you may need!!!
- \* The <u>syllabus is subject to change</u>. The progression of every course is dependent upon the unique dynamic between students, instructor, and unforeseen circumstances. Should anything in the syllabus need revision, your input will be considered. You will be notified in writing (in class and on Blackboard) of any modifications.
- \* Phone calls are a much better way to reach me than email. If I do not acknowledge receipt of an email within 48 business hours, please resend it.
- \* You will have the opportunity to attend seminars, and we may have guest lecturers. It is expected that you show the speakers the utmost respect: arriving early, staying the entire time, ensuring electronics are silenced, and remaining quiet during the presentation.
- \* Attending less than 50% of the class periods (as accounted by quiz scores) by the withdrawal deadline will result in a faculty-initiated withdrawal from the course.
- \* The use of personal electronic devices (cell phones, texting, laptops) is not permitted in the classroom. Activity on any device is very distracting to other students. Please ensure they are silenced.
- \* Should we have them, each of your in-class tests will BEGIN at the beginning of class time. It is essential that you be there at the start of the test to hear any announcements relating to the test. Showing up late is disrespectful of, disruptive for, and unfair to the students who do show up on time and puts you at risk for missing important information.
- \* Please consider the effects your actions have on others in the class (arriving late, loud crunching, rustling with bags & coats, speaking up too much, not respecting others perspectives, whispering while someone else is talking, etc).
- \* NEVER assume your email or phone message has been received until you receive confirmation from me!!!!! Technology has a way of gobbling up assignments and messages. It is YOUR responsibility to make sure an instructor gets the message/assignment, not the responsibility of TECHNOLOGY. If it is an important message you want read or heard, YOU make sure it has reached its final destination.
- \* Take care to avoid the paranormal exponential increase in computer crashes, jump drive malfunctions, cross-platform format changes, writing center closures, and printer failures around the time things are due! These are not acceptable excuses for late assignments. PLAN AHEAD. Know the hours for Writing Center and Computer Labs.
- \* All assignments should be STAPLED, proof-read, and turned in on clean pages with no spiral-notebook-frillies (i.e. *take pride in the final product you turn in*).

Disability Services: The Office of Disability Services at UAF implements the Americans with Disabilities Act (ADA), and insures that UAF students have equal access to the campus and course materials. I will work with the Office of Disabilities Services (203 Whitaker, 474-7043) to provide reasonable accommodation to students with documented disabilities. Please make arrangements with me within the first few weeks of classes. If you have any questions about the services available for individuals with documented disabilities, I would be happy to answer them.

Support Services: Writing support services are available on the UAF Campus in the Writing Center, located in 801 Gruening, 474-5314. You are encouraged to use this resource to meet writing expectations. In addition, Student Support Services are available at UAF. Services include: 1) free tutorial services; 2) small study groups; 3) academic advising, mentoring, and personal support; 4) direct financial assistance to qualified Pell Grant recipients; 5) use of laptop computers, labs, and other technology resources; and 6) cultural and social engagement. The office is located at 508 Gruening Building, and the phone number is 474-6844. You may also obtain additional information about support services at: <a href="http://www.uaf.edu/sssp/index.html">http://www.uaf.edu/sssp/index.html</a>

Extra Credit: No planned extra credit will be available for this course. The intent is for all your time and efforts to go into the assigned items and focus on the quality of your community service project.

# Participation Homework Worksheet (250 pts)

- \*Each sensory system must have a minimum of 15 pts of activity (successful points, not attempted points)
- \*You may choose any combination of activities within the stated minimum requirements
- \*Assignments will only be accepted in hard copy (STAPLED) at the beginning of class; place all assignments into the green folder. Anything handed in after 9:20am will be considered late and deducted one letter grade for every day late.

| Activities (pts): | Themes (30) | Ponderable (10) | Demonstration<br>2 written, 1 oral<br>(20) | Critical<br>Review (30) | Concept<br>Use (5) | minimum<br>15 pts |
|-------------------|-------------|-----------------|--|-------------------------|--------------------|-------------------|
| VISION            |             |                 |  |                         |                    |                   |
| HEARING           |             |                 |  |                         |                    |                   |
| TACTILE           |             |                 |  |                         |                    |                   |

#### PSY F470 - Ponderables – 10 pts

- \* Choose ONE of the provided questions or create your own question that has peaked your curiosity (samples of questions are provided in Blackboard).
- \* Research the topic from many different sources (primary scholarly, popular media, blogs, YouTube, pod casts).
- \* Prepare a 2 page essay that captures your new knowledge and your own reflections (e.g., perspectives, ideas, speculations, opinions) on the topic. Sample reflection questions are posted in Blackboard for you.
- \* Be sure to organize your essay with introduction-body-conclusion, and include a reference page (in APA format) of all the resources you used. See essay rubric for more details on writing expectations.

#### PSY F470 - Demonstrations – 20 pts

# THEMES across the sensory/perceptual systems

Construct a well-written essay that captures your research and knowledge on 9 of the 18 sensory themes. Your essay should be arranged in an introduction-body-conclusion format and adhere to the criteria presented on the essay rubric. You will submit this essay in APA-format, to include cover page, abstract, and references.

### Complete 9 total items, 3 from each section

# Choose 3 of the following 5

- 1. Purpose of system (include 1°, 2°, & 3° functions)
- 2. Source
- 3. Detection
- 4. Transduction
- 5. Serial and parallel pathways

\_\_\_\_\_

## Choose 3 of the following 8

- 6. Receptive field
- 7. Feature detectors
- 8. Lateral inhibition
- 9. Coding/mapping
- 10. Filtering
- 11. Threshold & sensitivity
- 12. Adaptation
- 13. Columnar organization

-----

# Choose 3 of the following 5

- 14. Top down/bottom up processing
- 15. Difference from other species
- 16. Difference between individuals
- 17. Disruptions and influences
- 18. Research methods

### **Defined - THEMES across the sensory/perceptual systems**

- 1. Purpose of system (identify examples of primary, secondary, and tertiary functions)
  - a. Primary info gathering for purpose of maintaining behavior, id, & discrimination
    - \* what types of information about the stimulus can be gained using this sensory/perceptual system
  - b. Secondary maintains or alters attention, alertness, & arousal
    - \* how does this system contribute to maintaining and to altering arousal ( $\uparrow$  or  $\downarrow$ )
  - c. Tertiary provides source of communication, pleasure, entertainment, and/or recreation
    - \* how might we use this system for communication purposes
    - \* how might this system contribute to pleasure

#### 2. Source (stimulus)

- a. what types of stimuli (or environmental events) are being detected by this system (i.e., what types of energy or mechanical stimulus is the body responding to)
- b. what characteristics of the stimulus is the system able to detect
- 3. Detection (structures and mechanisms)

where & how is the stimulus received (i.e. what structures/organs/receptors are involved in the detection of the stimulus, where are they located, and what does each structure contribute to the detection)

4. Transduction

how does the receptor convert the stimulus source to a neuronal signal (i.e., what mechanisms are involved)

- 5. Serial and parallel pathways
  - a. once transduced, where does the information travel (i.e., what are the tracks of neuronal information as it travels from receptor to cortex, what structures does the info pass through, what role does each structure along the pathway contribute
  - b. def'n: serial = linear or sequential pathways
  - c. def'n: parallel = branching or simultaneous pathways

-----

6. Receptive field

a.

#### 9. Coding/mapping (patterns of neural activity at all levels)

how are particular components of the stimulus translated to corresponding perceptions (i.e., pre-receptor, receptor, neuronal activity, pre-thalamus, thalamus, primary ctx, secondary c., association c.)

#### 10. Filtering

- a. what aspects of the stimulus gets filtered
- b. where does filtering occur and what types of info are getting filtered

#### 11. Threshold & sensitivity

- a. what are the limitations of the system (i.e., what is the minimal perceptible quantity of the source)
- b. what are the characteristics of the stimulus that require minimal and maximal signal strength
- c. what is the relationship between the stimulus strength and its relevance to humans

#### 12. Saturation

how does this sensory system respond to repeated stimulation

#### 13. Adaptation

how does the system change its responsiveness to different levels of stimulation

#### 14. Columnar organization

- a. how are the cells organized in the cortex (i.e., what characteristic of the original stimulus are organized into columns in the cortex)
- b. if not in columns, then how organized

-----

#### 15. Bottom up/top down processing

- a. how does this system contribute to BU and to TD processing
- b. def'n: BU using details of the stimulus itself (e.g., freq, amplitude, intensity, texture, etc)
- c. def'n: TD using context and experience (e.g., meaning, identification, labels, etc)

#### 16. Difference from other species

how does this system differ in structure and/or function in another species

#### 17. Difference between individuals

what aspects of the structure and/or function of this system varies among individuals (i.e., what aspects remain stable across individuals, what characteristics are susceptible to change)

#### 18. Disruptions and influences

- a. how can normal functioning of this system lead to altered perceptions (e.g., illusions, systematic errors, mixed messages, etc)
- b. what are some ways in which the function of this system can be altered (either enhanced or diminished) (e.g., culture, genetics, disease, trauma, drugs, age, experience, practice, etc)

#### 19. Research methods

what are some research methods used to study this system

### **PSY F470**

# **Community Service evaluation and reflection**

# Number of total hours

This item is for my departmental files ONLY for an accurate record of the number of community service hours. The number of hours you provide has NO impact on your grade; so please be honest! Review your journal and record the approximate number of hours you spent with your WV partners (include all interactions - phone conversations, meetings, and Fair Day; do NOT include messages you left for them)

| Comment  | Description of subjective assessment  |
|----------|---|
| exc      | Excellent; above expectations; reflects high quality and/or depth   |
| good     | Good; meets requirements and done well with clarity and understanding   |
| ok       | OK; basic; may be missing some piece, or lacking in some depth, thought, or effort  |
| NTS      | Not To Standard; needs attention; could include: missing many parts, poor quality, lack of effort & thought;  |
|          | lack of understanding of assignment; doesn't meet intent of assignment  |
| E        | Essay structure – intro, main point, body, conclusion   |
| F        | Essay development – transition, flow, organization of thoughts, readability   |
| (        | Grammar & sentence construction   |
| (        | Content - thought development, substance, depth   |
| S        | support – use of references, examples, etc.   |
| J        | Jse of feedback – changes and improvements over last assignment   |
| A        | Abstract  |
| A        | APA Style   |
|          |   |
| The item | s checked below apply to your paper:  |
|          | more to a technical prose rather than a creative style for papers in this class (i.e., avoid slang,   |
|          | saggerated language, superlatives, figures of speech, streams of consciousness, conversational tone,  |
|          | iomatic expressions, etc) "say what you mean, mean what you say" and move on  |
|          | areful not to spend too much time building an introduction. Especially for shorter essays, it leaves you  |
|          | o room for substance on your main point.  |
|          | duce your <i>topic and thesis</i> in the introduction, not the outline of the paper (i.e., avoid statements such a "In this paper, I will present, then I will address, finally I will conclude with) |
|          | areful not to present an opinion as "fact" – if you think it's a fact, then you need a reference citation.  |
|          | therwise, you need to be clear it is an opinion (without using the first person) – e.g., "it seems that"  |
|          | d the use of "this" by itself – leaves the reader asking "this what?"   |
|          | g. This is why, This is seen everywhere, This happens all the time, This is the case when   |
| etc)     |   |
|          | d the use of questions in presenting an idea – it reduces the opportunity for you to provide substance;   |
|          | ork on 'answering' the questions, not taking space asking them  |
|          | d the use of contractions – it tends to leave the impression of lazy writing  |
|          | are to proofread  |
|          | d the use of quotes except in special circumstances where the wording itself adds something unique  |
|          | ure your conclusion wraps things up, providing the intended "take-home" message reflecting applications or bigger meaning of your thesis/theme  |
|          | d introducing new arguments in the conclusion   |
|          | gest taking advantage of available resources such as my office hours, peer evaluation, writing center,  |
|          |   |

#### **Comments:**

etc.

# <u>PSY 470 — Oral Presentation Rubric</u>
